Toelichting behorende bij de Regeling maximumprijzen geneesmiddelen

1. Algemeen

De prijzen van geneesmiddelen in Curaçao gaan aanzienlijk uit boven de prijzen van vergelijkbare geneesmiddelen in andere landen. Uit tabel 1 blijkt dat de importeurs van geneesmiddelen daar significant aan bijdragen. Het aandeel van de importeurs (*wholesalers*) in de totale kosten voor geneesmiddelen op Curaçao, bedraagt 28%.⁵ Dit is hoger dan het gemiddelde importeursaandeel in de OECD-landen⁶.

Tabel 1: Relatief aandeel van de componenten in de opbouw van de kosten van geneesmiddelen.

Daarmee worden geneesmiddelen door importeurs aangeboden tegen zodanige prijzen, dat het vragen daarvan, gelet op het feit dat het vergoeden van geneesmiddelen in overwegende mate ten laste van de gemeenschap komt, in strijd is met het algemeen belang. Derhalve gaan daar negatieve budgettaire gevolgen van uit voor de overheid zoals later in deze toelichting zal blijken. In dat kader is onderzoek gedaan naar de wijze waarop de kosten van onder meer geneesmiddelen kunnen worden beperkt. In het rapport Verlaging Kosten Geneesmiddelen van 11 november 2011 zijn daartoe aanbevelingen gedaan. De Raad van Ministers is bij besluit van 23 november 2011, nr. 2011/90350, met dat rapport akkoord gegaan.

Het is daarom wenselijk de door importeurs gehanteerde prijzen aan een maximum te binden waardoor een verlaging in de verkoopprijzen wordt gegarandeerd.

⁵ Policy instruments to manage pharmaceuticals costs: real options of no options (2010)

⁶ The OECD (Organisation for Economic Co-operation and Development) is an international organisation of countries with highly developed economies and democratic governments.

In het kader van het verlagen van de kosten van geneesmiddelen is namens de regering overleg gevoerd met de vertegenwoordigers van de importeurs van geneesmiddelen op Curaçao. Daarbij is informatie uitgewisseld en gestreefd naar consensus over de te nemen maatregelen ter verlaging van de prijzen van geneesmiddelen. Die consensus is niet bereikt. De regering, als bewaker van het algemeen belang, heeft daarop een aantal maatregelen goedgekeurd terzake (de prijzen van) geneesmiddelen. Onderhavige regeling dient mede ter uitvoering van dat raadsbesluit⁷. Deze regeling is, voorafgaand aan haar afkondiging, door de Raad van Ministers goedgekeurd.

2. Budgettaire gevolgen

De kosten van de gezondheidszorg op Curaçao zijn vergeleken met de OECD-landen relatief hoog, namelijk respectievelijk 13,1%⁸ van het bruto nationaal product (BNP) tegen gemiddeld 9,5% van het BNP in de OECD-landen. Voor Curaçao is dat in geld uitgedrukt omstreeks NAF. 665⁹ miljoen per jaar. Uit een recent onderzoek¹⁰ op Curaçao blijkt dat het aandeel van de farmaceutische kosten in de totale zorgkosten circa 25% is. In vergelijking met Nederland (9.8%), Spanje (22%)¹¹, de OECD-landen (gemiddeld 15%), Barbados (14%) en Aruba (21%), is dit aandeel hoog te noemen. De kosten van de gezondheidszorg komen in overwegende mate ten laste van de begroting van de overheid.

De overheid heeft als taak om zorg te dragen voor een sluitende (meerjaren)begroting, die voldoet aan de begrotingsnormen conform de Rijkswet financieel toezicht Curaçao en Sint Maarten. In 2011 zijn er forse overschrijdingen bij de ziektefondsen gerealiseerd, namelijk NAF. 67 miljoen bij het ZV/OV-fonds¹² en NAF. 15 miljoen bij het BZV-fonds.

Om te komen tot sluitende begrotingen 2009, 2010 en in verdere jaren, is mede op verzoek van het College Financieel Toezicht vanaf begin 2009 een aantal dekkingsmaatregelen vastgesteld. Deze maatregelen moesten oorspronkelijk leiden tot een bezuiniging van circa NAF. 50 miljoen per jaar. De belangrijkste dekkingsmaatregelen betreffen: de hervorming AOV, het geneesmiddelen traject en de introductie van een basisverzekering. Om de financiering van de kosten van de gezondheidszorg duurzaam te maken is het naast de introductie van de basisverzekering nodig om aanzienlijk te bezuinigen in de kosten geneesmiddelen.

De totale farmaceutische kosten van de publieke verzekeraars bedroegen in 2010 NAF. 116.8 miljoen, waarvan NAF. 90.6 miljoen betaald is aan geneesmiddelen en NAF. 26.2 miljoen aan apothekersvergoeding.

Deze regeling zal naar verwachting een besparing voor de publieke verzekeraars opleveren van minimaal NAF. 19,6 miljoen¹³ op jaarbasis.

3. Artikelsgewijze toelichting

Artikel 1

Met Bijlage I wordt bedoeld de lijst van geneesmiddelen met maximumprijzen per eenheid product en per sterkte, en farmaceutische vorm. Deze bijlage zal, als onderdeel van de ministeriële regeling worden gepubliceerd en zal tevens digitaal beschikbaar zijn op www.gobiernu.cw.

Artikel 3 (Maximumprijzen)

In het eerste lid van artikel 3 worden de voor de in de bijlage I opgenomen geneesmiddelen geldende maximumprijzen vastgesteld. De bijlage vormt een integraal deel van de regeling. De maximumprijzen zijn tot stand gekomen door voor ieder geneesmiddel steeds de laagste prijs te nemen van(A) en (B), waarbij:

- (A) is de voor de importeurs op 16 december 2011 geldende af-fabrieksprijs (in NAF.) van het geneesmiddel, verminderd met 15%, vermeerderd met een vergoeding van 10% voor vracht- en assurantiekosten en het werkelijke percentage van de invoerrechten, en vermeerderd met een opslag van 20%. De 15% vermindering is de door de fabrikant toe te kennen verlaging van de af-fabrieksprijs, conform brief d.d. 5 maart 2012 nr 2012/7786. Algemeen bekend is daarbij dat fabrikanten prijsdifferentiatie toepassen afhankelijk van de bestemmingsmarkt. De 10% vergoeding voor vracht- en assurantiekosten wordt als gemiddelde kostendekkend geacht. Bovendien gebruiken de vertegenwoordigers van de importeurs een gelijk percentage in hun huidige prijsberekening. Voor de opslag voor de invoerrechten wordt het werkelijke percentage gebruikt. Omzetbelasting is in de vergoeding niet meegenomen nu de importeurs daarvoor vrijstelling hebben of op aanvraag (teruggaaf) kunnen verkrijgen. In de 20% opslag zijn alle overige kosten, risico en winst begrepen; en
- (B) is de voor het geneesmiddel door in ieder geval één importeur (groothandel) in Nederland gehanteerde (af-fabrieksprijs) vermeerderd met een vergoeding van 10% voor vracht- en assurantiekosten, het werkelijke percentage van de invoerrechten, en vermeerderd met een opslag van 20% en omgerekend naar NAF. De prijzen van de Nederlandse importeur zijn oorspronkelijk in EUR gesteld. Omrekening in de officiële valuta van Curaçao heeft plaatsgevonden, en zal in ieder semester plaatsvinden, door uit te gaan van de gemiddelde wisselkoers over het voorafgaande semester van de EUR ten opzichte van de officiële valuta van Curaçao.

Het tweede lid bepaalt dat indien in een van de bijlagen voor een geneesmiddel de prijs van meer dan één verpakkingsgrootte is vermeld, slechts in aanmerking wordt genomen de prijs van de verpakking met de laagste prijs per eenheid product.

Artikel 4 (Wijziging)

In dit artikel wordt geregeld dat de Minister tenminste tweemaal per jaar onderzoekt of er aanleiding is deze regeling te wijzigen. Thans wordt uitgegaan van 2 referentieprijsen bij de berekeningswijze van de prijzen van de geneesmiddelen. De regering is voornemens om bij wijziging van deze regeling hieraan een derde referentieprijs toe te voegen, namelijk de lijst die door één of meer importeurs in de Verenigde Staten van Amerika wordt gehanteerd.

Artikel 5 (Voorschriften voeren administratie)

Deze op artikel 2 van de Prijzenverordening steunende voorschriften dienen teneinde de controle op naleving van deze regeling door de importeurs te vereenvoudigen.

Artikel 8 (Inwerkingtreding)

Deze regeling treedt in werking met ingang van 1 juli 2012. Daarmee wordt de importeurs ruim twee maanden de tijd gegund zich op de nieuwe situatie in te stellen.

De Minister van Economische Ontwikkeling,

A.N. EL HAKIM
